SCIENCE & HEALTH INNOVATION
FOR THE NEXTGEN EXPLORERS

icmr
INDIAN COUNCIL OF
MEDICAL RESEARCH
Serving the nation since 1911

MEET THE INDIAN COUNCIL OF MEDICAL RESEARCH (ICMR)

Who discovers
new **vaccines**?

What happens
inside a real
science lab?

How do we fight
deadly diseases?

Have you ever wondered who develops vaccines, discovers new treatments, or protects India from diseases?

That's ICMR! Since 1911, ICMR scientists have been solving real health challenges through research, innovation and technology, making India healthier and ready for the future, and the next great scientist could be YOU!

With **28** research institutes
across the country, ICMR
scientists work on

- Diseases like **TB, malaria, kala azar & hathi paon**
- **Nutrition** and **non-communicable diseases** (like diabetes, cancer & heart disease)
- Health of groups in need of extra care – **expecting and nursing mothers, young children, and tribal families**
- **Stopping the spread of diseases** and preparing for future pandemics

OUR SUPERPOWERS

**Building better cures
and smarter tests**

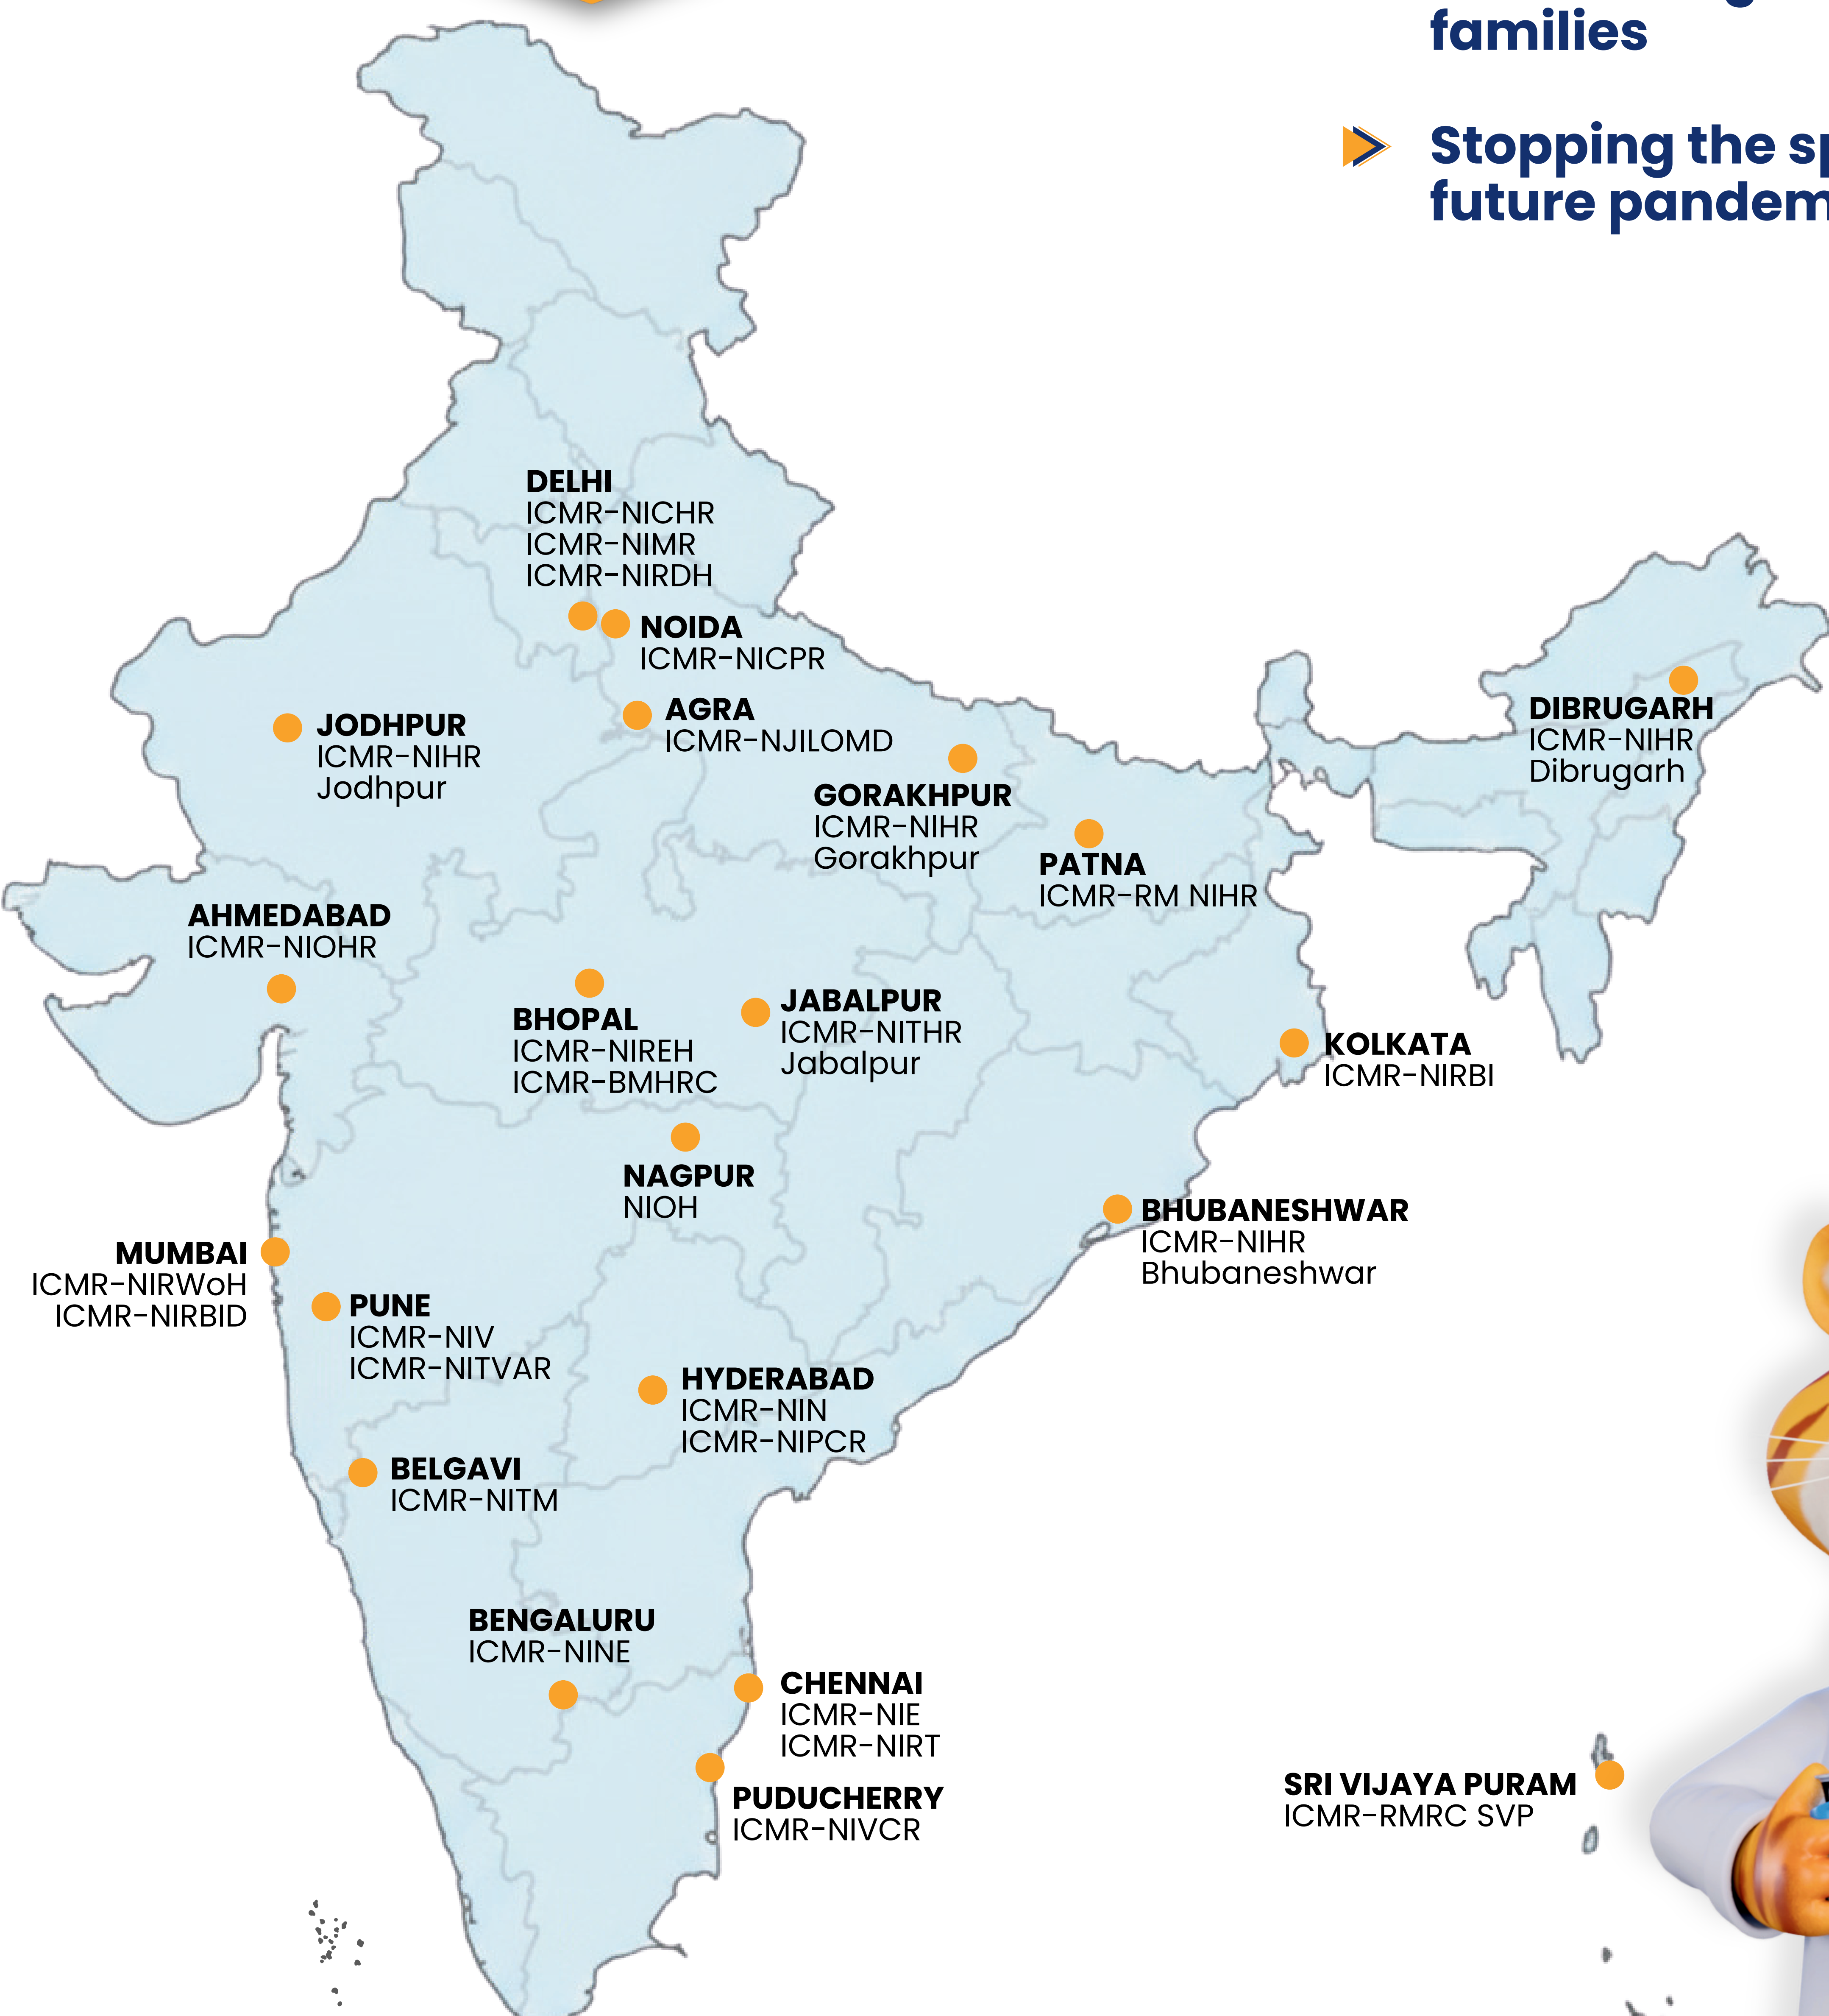

**Solving real health
problems using science**

**Making medicines and
vaccines for millions**

**Training the next generation
of aspiring innovators
like YOU**

**DID YOU
KNOW?**

ICMR scientists helped wipe out polio in India – and today, they're leading the charge against anemia, TB, dengue, and more!
