SCIENCE & HEALTH INNOVATION FOR THE NEXTGEN EXPLORERS

icmr
INDIAN COUNCIL OF
MEDICAL RESEARCH
Serving the nation since 1911

Imagine being someone who helps **stop a pandemic!** Or the one who discovers a **novel cure** for a deadly disease that claims a **million lives** each year. The Science Heroes at **ICMR** do all of this and more.

How can YOU become a scientist?

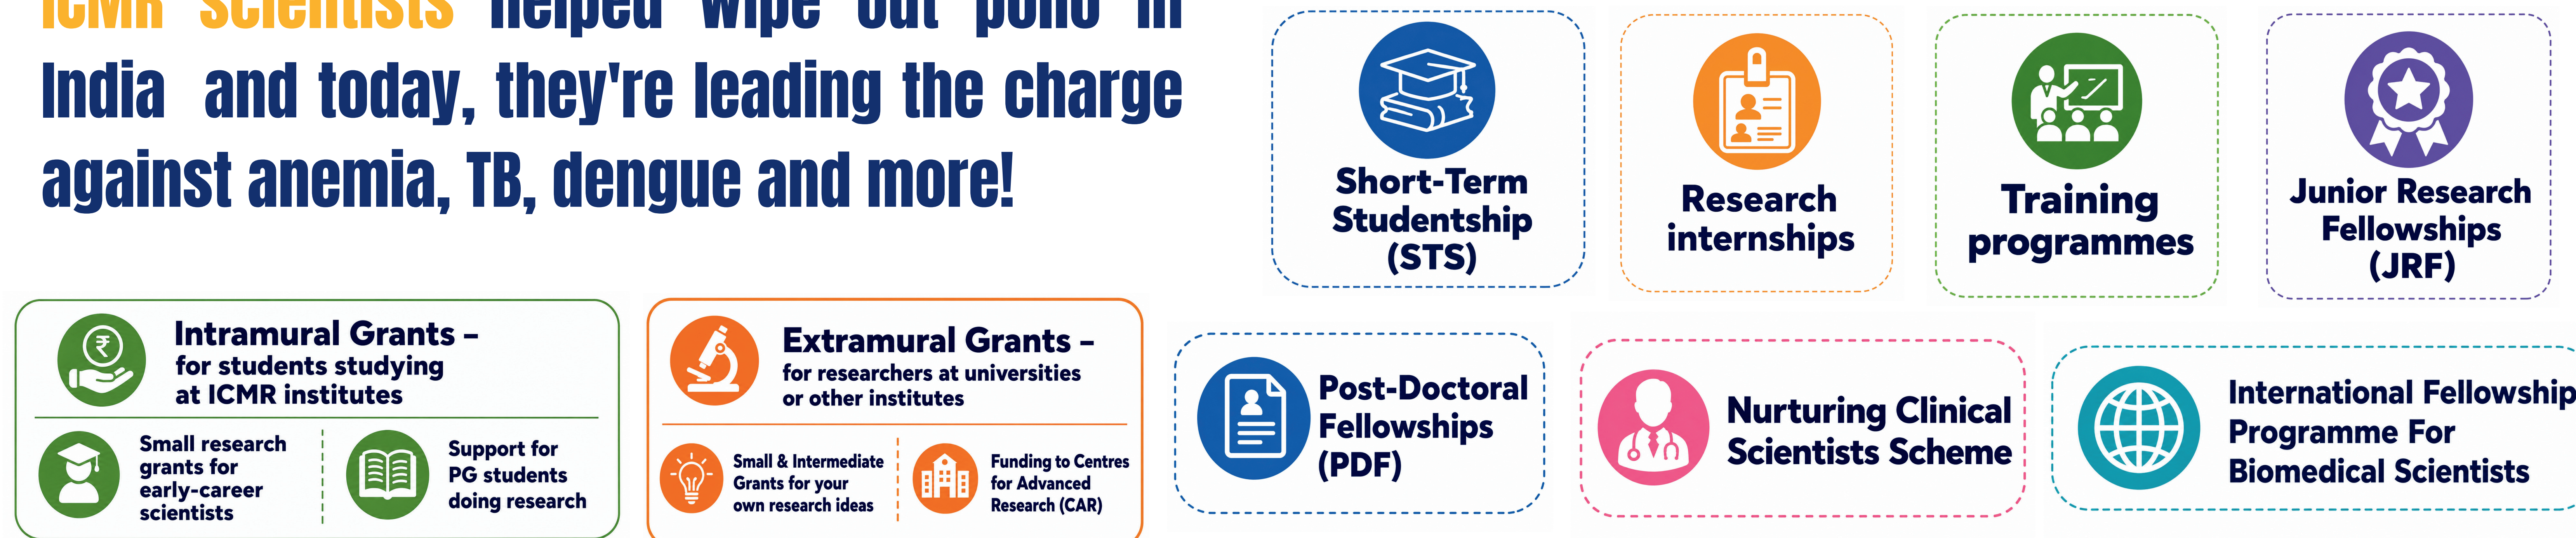

Science is not just a subject, it's a way of thinking. Your journey can **start today**, from wherever you are!

What do Scientists at ICMR do?

- Study new viruses and prevent future pandemics
- Design cures & treatments for fatal diseases
- Track and control disease progress across regions
- Discover critical health facts
- Influence national & global health decisions

How can ICMR help you in this journey?

ICMR scientists helped wipe out polio in India and today, they're leading the charge against anemia, TB, dengue and more!

Dr. V. Ramalingaswami
A global leader in nutrition science and winner of the Padma Shri, Padma Bhushan, and Padma Vibhushan (highly prestigious civilian honours in India).

Fun Fact
ICMR's headquarters building in New Delhi is named after him. Also, 8th of August marked his 105th birthday!

Dr Khorshed M. Pavri
India's first recognized and distinguished virologist and former Director of the ICMR-National Institute of Virology (NIV), Pune.

Fun Fact
She got an electron microscope installed at NIV – a super powerful tool that helps scientists see viruses up close!

Dr S. Radhakrishna
A brilliant statistician who showed that TB patients could be safely treated at home, a discovery that changed global health policies around care of TB patients!

Fun Fact
He always carried slips of paper and a pen for to-do lists and was known for his witty anecdotes and clever quotes from poets, leaders, and scriptures.
